

We Survey and Install Steam Traps

Proven Solutions to Energy Savings

Need to evaluate how well your steam traps are performing?

Steam Trap Survey – working in partnership to deliver a cleaner more efficient future

- **Failed traps cost thousands of dollars annually**
- **We are an Ameren UE Value Added Partner**
- **Some local utilities offer rebates for these surveys and installation**
- **Survey is free if we install the traps. Otherwise, there will be a \$30.00 charge per trap**

Call us today to set up an appointment and discuss how we can save you money.

It has been evident in recent years that our customers' requirements have changed due to the significant increase in fuel costs and environmental issues. Many of our customers have been forced to make cost cutting exercises resulting in the reduction of facility steam experience. This is where Solutions Group can help support you. We test every trap with infrared and ultrasonic equipment, along with visual inspection to determine proper operation. We provide a written report, dependent on the audit, typically covering: inventory of equipment audited, description of problems identified and recommendations aimed at improving energy losses. This is how our steam services have evolved to support you, by helping you reduce cost, by working along side your facility teams to improve and sustain your plant efficiency.
